

To Our Valued Customers:

Since 1922, Mentor Lumber & Supply Companies have been the number one source of lumber and building materials for the professional builders and remodelers in Northeast Ohio. We are extremely proud of this distinction, and we realize that our success is measured on a day-to-day basis by our customers. In order to maintain this position, we must continue to work smarter and work harder. This is why we are constantly searching for new ways to refine our product line and improve our service.

One of the things we have discovered in our market is a void in the number of dealers who offer high quality, “In Stock” moulding and millwork at a competitive price. Many boast of a large variety available, but few provide the selection Mentor Lumber has in stock on a daily basis.

These are just some of the reasons why we have developed our new Moulding & Millwork Catalog. This new catalog provides you with a simple method of finding the moulding or millwork you need in stock and without delay. We can also assist you with finding those items, which may not be “In Stock.” Our highly professional team of sales specialists will be happy to help you find those products that fit your needs.

If you would like to separate yourself from the pack, we also offer the “Signature Series”. We can manufacture custom patterns to your specifications, which will differentiate your home(s) from the competition. Some restrictions apply, so please speak to us for further details.

We’re serious about meeting the demands today’s sophisticated buyers can place on you. So, when you are in need of a partner, as well as a supplier of quality moulding and millwork, we hope you will call Mentor Lumber & Supply Companies.

Our mission is the same today as it was over 80 years ago, which is to “Exceed Your Expectations.”
